is currently displayed as "good" or "not good". Depending on the status, the decision goes to element 85A or 85B respectively. Element 86 then determines if the audio distortion has remained below the limit for a preselected period of time. If it has, the output good 91 is produced. Otherwise, output not good 92 is produced. The inverse decision process is provided by block 88.-- .

## REMARKS

The present Amendment is requested by applicant to clarify the specification and render it in compliance with the drawings. Since it does not represent prohibited new matter, entry of this Amendment is proper and respectfully requested.

Signed at Boulder, Colorado this *17* day of February, 2000.

Respectfully submitted,

Earl C. Hancock, Reg. No. 19,472
